DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claims 9-15 and 25-28 are pending and have been examined.

Allowable Subject Matter

3. Claims 9-15 and 25-28 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not teach the combination of features of the claimed invention, particularly including the features of recording on a motion picture record medium a plurality of separate coded symbols, where each symbol represents a digit of a multi-digit security code and recorded in a separate frame of the motion picture recorded on the medium, wherein each of the symbols represents one digit of a unique identification number assigned to a copy or print of a motion picture, all in combination with the other claim limitations recited by the independent claims, and in the manner disclosed by the Applicant in his Specification.

Claim 25 is drawn to a process (a method) of counterfeit detection utilizing coded symbols. The Examiner believes the claim meets the standard for patentable subject matter as established by the Court in *In re Bilski*, 545 F.3d 943, 88 USPQ2d 1385 (Fed.

Cir. 2008) because it meets the second criteria of the "machine or transformation test" wherein a claim drawn to a process (a method) must transform a particular article to a different state or thing. In claim 25, a motion picture film copy is transformed by the step of recording on it the coded symbols utilized in the method steps that follow. The transformation here is non-trivial and is critical to the overall method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
